

Possible applications include :

Common accessories
for gates

Features

- Aluminium lever handles
- Lever handle fastening with stainless steel needle screws
- Delivered with a 7 mm stainless steel spindle bar and assembly key

Tip

- Be sure to choose the correct lever handle for your application.

Thickness dimensions are indicated for the overall assembly thickness: support thickness (shutter, door, gate) + lock thickness + plate or hole thickness.

The spindle bar is adjustable within the anti-slip shape limit. Possible combinations with our other lever handles. Please contact us for more information.

Possible applications include :

Common accessories
for gates
